---

We need a fire station. I do not think we need anything other than the most basic of stations. This town is hurting both financially and quite honestly the culture is volatile. Let's get the basic needs met and work to correct other areas needing work, including improving our debt ratio and making this a town people still want to raise their kids and can afford to do so. Look to spend on improving our water quality and pressure, an important necessity to life. If there is a want for a sleep area and weight room, I think we leave a shell of a room. We fundraise to make those rooms how they want them in the future. No need for a kitchen, just a shell. Again fundraise to make it what we want in the future without creating debt to pay back. Ask for donations for camping cots, Camping stoves, things of those nature at this time to make it doable, similar to our military or camping. It can be comfortable. We could build bunks ourselves. Maybe businesses in town donate for a tax break to finish it in the future, whether time, money or supplies.

We have a lumber yard right here in town.

Again, let's get the basics. It doesn't have to be fancy and costly. Sometimes less is more and we should be a little more frugal with our spending, for that I count on this counsel. Let's fundraise more often and take out less loans. Put forth the work and effort and get rewards in return.

Thank you,  
Michelle Pugh
